

Haymatic® hay feeder

Haymatic® is a patented and innovative hay feeder for paddocks and outdoor horse environments. It is a ready-made product that does not require large or expensive modifications to the stable. The feeder is safe, energy-efficient, and enables species-appropriate feeding of horses.

Thanks to its ingeniously simple operating principle, Haymatic® guarantees reliability. It opens up to 12 times per day, providing horses with regular hay rations. Designed to be durable, it functions reliably in all weather conditions.

The rectangular feeder offers plenty of space for both horses and hay. It holds two round bales (maximum diameter 130 cm), one large round bale, or a 2.5 m long square bale.

The doors can be installed on one or two short sides. On the long side, fixed double doors can be installed, providing 10 feeding slots.

Haymatic® 4L €8,900 (VAT 0%)*

Version with double doors €8,450 (VAT 0%)*

* Local VAT will be added to the price.

Base height	60 mm
Weight	550 kg
Electrical components IP rating	IP54
Power supply	230 V
Motor power	0,25/0,37 kW
Operating temperature	-25 – +40°C
Warranty	2 years

Design and
placement tips

The Haymatic® hay feeder only requires a level, frost-free surface and a power outlet to operate. The most durable and user-friendly foundation is concrete or a similar solid base, which is easy to keep clean. It is recommended to place the feeder slightly higher than the surrounding ground.

**Simplify everyday life, save time
and improve your horses' well-being!**

Set feeding times.
Up to 12 times per day.

**Determine the feeding time
duration**

**Determine the height of the
feeding walls**
Suits large horses and small ponies

New Bale feature
Save the hay from settling and spreading.
