

Haymatic® Smartkit automatic hay feeder

Haymatic® is a patented and innovative automatic hay feeder designed for horse paddocks and open stables. The feeder is safe, energy-efficient, and enables species-appropriate feeding for horses. Our Smartkit do-it-yourself automation solutions are available for existing hay racks.

We have automated various hay racks, including brands such as Kerbl, Kellfri, and Jourdain. The hay rack can be automated on three sides.

With its ingeniously simple operating principle, Haymatic® ensures reliability. It opens up to 12 times per day, providing horses with regular hay rations. It is built to withstand and operate reliably in all weather conditions.

Haymatic® Smartkit starting from 3.500 € (VAT 0%)*

* The applicable VAT for each country will be added to the price
